

ROUND BALE CRADLE FEEDER

The newest addition to our farming range is the round bale cradle feeder. This feeder is universal, meaning it can be used for cattle, sheep or horses. The frame is made using 50mm x 25mm box iron with 32mm round bar slates. Fully galvanised after manufacture and finished off with box iron end caps. It is delivered in a flat pack format, with five parts that simply bolt together using the 8 bolts provided; meaning it only takes 10 minutes to construct.

The dimensions are:

Width	1530mm
Depth	1580mm
Overall Height	1220mm
End Panel Height	955mm
